

46. (Twice Amended) The method of manufacturing a matrix type display device according claim 34, wherein the potential distribution is formed so that the potential [of] at each of the predetermined positions is opposite to the potential at the periphery [thereof].

REMARKS

Claims 1-49 are pending. By this Amendment, the Abstract, specification and claims 1-39 and 44-46 are amended.

Should the Examiner believe that anything further is desirable in order to place the application in better condition for allowance, the Examiner is invited to contact the Applicant's undersigned representative at the telephone number listed below.

Respectfully submitted,
